

Patch-It™

Pre-Printed 5" Block Creative Layout Concept by Faye Burgos

Patch-It was developed on the heels of Faye's widely popular Strip-It pre-printed stripe innovation, this time giving quilters a pre-printed patchwork design of 5" squares. It can be used as it is, printed, for quick "cheater" quilt blocks, or cut and pieced creatively in various ways to make intricate-looking designs with minimal effort. These examples show creative techniques using the Patch-It fabric and coordinates for easy yet beautiful results.

Featured Collection: **NEW LONDON** by Faye Burgos

#1 - Drunkard's Plus

Cut 10" background squares of various textures prints.

Block A: Position the 8" circle (dotted line) template over the Patch-It fabric, with the center of the template meeting the intersection of any four fabric prints.

Block B: Position the 8" template, centering it over one complete 5" print, with adjoining prints framing it as shown.

Cut out the fabric circles as shown above; be sure to select a variety of print sections for each block. Center over the background block and appliqué using your favorite method, (turned under, raw edge, etc). Join blocks. Add borders, layer, quilt as desired and bind. (Stitch between each of the prints to give the quilt a pieced look!)

#2 - Perfect Pinwheels

PINWHEEL
TEMPLATE

Position template where
prints intersect

Cut squares

Available through
www.country-schoolhouse.com

Piece the 4 cutouts
together and
join to make a 4-patch

Rotate the four-patches to create
pinwheels & join to create blocks.

#3 - Strip-Set Quilt

Create a super-simple quilt by alternating 5" strips of Patch-It with strips of one coordinating texture print, as shown. The texture print areas are the perfect space to show off hand or machine quilting designs.

Cut 5" wide strips of the Patch-It squares.
Cut 3" wide strips of texture print coordinate.
Piece strips together. Add borders, layer, quilt as
desired and bind. (Stitch between each of the prints
to give the quilt a pieced look!)
